

SCREWS, JEWEL — Balance, Barrel, Center, Third, Fourth, Escape, Pallet

When a model requires jewel screws to hold certain kinds of jewels, this is indicated by "U" for upper and "L" for lower under the headings of the kinds of jewels. Where (—) appears, model does not use screws in these positions. The same screw (example E5917) is used in different positions on many different models. Therefore this chart gives you maximum interchangeability.

FOR MODELS NOT LISTED ABOVE, see **SCREWS, WINDING WHEEL**

SCREWS, JEWEL
see Next Page

SCREWS, JEWEL — Balance, Barrel, Center, Third, Fourth, Escape, Pallet

When a model requires jewel screws to hold certain kinds of jewels, this is indicated by "U" for upper and "L" for lower under the headings of the kinds of jewels. Where (—) appears, model does not use screws in these positions. The same screw (example H5846) is used in different positions on more than one model. Therefore this chart gives you maximum interchangeability.

Marshall Stock No.	Size	Thread	Balance	Barrel	Center	Third	Fourth	Escape	Pallet	Grades	Factory No.

SCREWS, JEWEL — Balance, Barrel, Center, Third, Fourth, Escape, Pallet

When a model requires jewel screws to hold certain kinds of jewels, this is indicated by "U" for upper and "L" for lower under the headings of the kinds of jewels. Where (—) appears, model does not use screws in these positions. The same screw (example H5846) is used in different positions on more than one model. Therefore this character gives you maximum interchangeability.

SCREWS, JEWEL

Balance, Center, Third, Fourth, Escape, Pallet

When a model requires jewel screws to hold certain kinds of jewels, this is indicated by "U" for upper and "L" for lower under the headings of the kinds of jewels. Where (—) appears, model does not use screws in these positions. The same screw (example R5828) is used in different positions on more than one model. Therefore this chart gives you maximum interchangeability.
